- Hardware and software troubleshooting
- Desktop computer assembly, disassembly, and maintenance
- Windows PC setup and configuration
- Software installation, configuration, and troubleshooting
- Technical assistance and end-user support
- Printer and scanner installation, configuration, and troubleshooting
- Projector, display monitor, and meeting-room equipment setup

Programming and Web Development
- HTML, CSS, and JavaScript
- Next.js and Node.js fundamentals
- Java and Python programming
- MySQL/MariaDB database fundamentals
- Prisma ORM
- Git and GitHub
- Basic frontend and backend development

IT Operations
- User account setup and computer domain joining
- IT equipment inventory and asset management
- Basic server-room inventory
- Remote meeting and conferencing equipment setup
- Basic website maintenance and improvement

Tools and Platforms
- Visual Studio Code
- XAMPP
- Prisma
- Git
- IntelliJ IDEA
- PyCharm
- Fortinet and EnGenius networking technologies
- Cisco Packet Tracer
- Figma

Professional Experience

INTERN - STARLIGHT BUSINESS CONSULTING SERVICES INC.

Web Developer 02/2026 – 07/2026
Contributed to company website design, maintenance, and frontend/backend improvements. Makati

IT Support/Helpdesk

- Provided technical support to employees by troubleshooting computer hardware, software, and network connectivity issues.
- Set up computers for new employees, including domain joining and user account configuration.
- Performed PC assembly, disassembly, hardware diagnostics, and computer maintenance.
- Installed and configured Epson printers, scanner drivers, and other office peripherals.
- Troubleshot LAN connection issues, traced network cables, and created Ethernet cables using RJ45 connectors.
- Installed and configured software applications, including Adobe Acrobat and WeChat.
- Set up projectors, display monitors, audio systems, and video conferencing equipment for meetings and client presentations.
- Managed IT equipment inventory, including computer components, accessories, and server-room items.
- Assisted with CCTV setup and technical troubleshooting.

Projects

See You in CEU: A Digital Lost and found, *Technologies: Flutter, Firebase*
Worked on a capstone project concept for a mobile application intended to help users report, browse, and recover lost items.

BuildYourPC E-Commerce Website, *Technologies: Next.js, JavaScript, Prisma, NextAuth, MariaDB*
Developed an e-commerce website concept for computer hardware, with authentication and database integration. Worked on checkout and order record functionality, including GCash payment-related features.

IT Support Ticket System, *Technologies: Next.js, JavaScript, Prisma, MySQL/MariaDB*
Developed an IT support ticket management web application with ticket creation, status updates, priority management, searching, filtering, and ticket assignment. Currently working on client authentication and ticket communication features.

Flappy Bird Game, *Technologies: Java, Java Swing*
Created a 2D game using Java and Swing, applying programming fundamentals, graphical user interface development, event handling, and game logic.

2D Metroidvania Game, *Technologies: Godot Engine, GDScript*
Worked on a 2D platformer game project using Godot and GDScript, exploring game mechanics and interactive gameplay.

Education
