PROFESSIONAL SUMMARY

Entry-level Information Technology candidate with hands-on internship experience in web development and IT support. Familiar with Java, JavaScript, HTML, CSS, SQL databases, and web application tools. Built academic and personal projects involving database integration, authentication, ticket management, and GUI programming. Brings a practical troubleshooting mindset, willingness to learn, and experience supporting end users.

TECHNICAL SKILLS

Programming and Web: Java, Python, C#, JavaScript, HTML, CSS; React, Vite, Spring Boot, Next.js and Node.js fundamentals; basic frontend and backend development

Databases and Tools: MySQL/MariaDB, Prisma ORM, Git, GitHub, Visual Studio Code, IntelliJ IDEA, PyCharm, XAMPP, Figma

IT Support and Operations: Hardware/software troubleshooting, Windows PC setup, software installation, user account setup, domain joining, LAN troubleshooting, printer/scanner setup, Ethernet cable creation, IT asset inventory, meeting-room AV setup

Other Technologies: Cisco Packet Tracer, Fortinet and EnGenius networking technologies

INTERNSHIP EXPERIENCE

STARLIGHT BUSINESS CONSULTING SERVICES INC. | Makati, Philippines

Intern – Web Developer / IT Support & Helpdesk | February 2026 – July 2026

- Contributed to company website design, maintenance, and frontend/backend improvements.
- Troubleshot computer hardware, software, and network connectivity issues for employees.
- Prepared computers for new employees, including domain joining and user account configuration.
- Performed PC assembly, disassembly, hardware diagnostics, and maintenance.
- Installed and configured Epson printers, scanner drivers, and office peripherals.
- Troubleshot LAN connection issues, traced network cables, and created Ethernet cables using RJ45 connectors.
- Installed and configured software applications, including Adobe Acrobat and WeChat.
- Set up projectors, monitors, audio systems, and video-conferencing equipment for meetings and client presentations.
- Maintained IT equipment inventory, including computer components, accessories, and server-room items; assisted with CCTV setup and troubleshooting.

SELECTED PROJECTS

BuildYourPC E-Commerce Website | Next.js, JavaScript, Prisma, NextAuth, MariaDB

Developed an e-commerce website concept for computer hardware with authentication and database integration. Worked on checkout and order-record functionality, including GCash payment-related features.

IT Support Ticket System | Next.js, JavaScript, Prisma, MySQL/MariaDB

Developed a ticket-management web application with ticket creation, status updates, priority management, search, filtering, and ticket assignment. Client authentication and ticket communication features are in progress.

See You in CEU: Digital Lost and Found | Flutter, Firebase

Worked on a capstone project concept for a mobile application intended to help users report, browse, and recover lost items.

Flappy Bird Game | Java, Java Swing

Created a 2D game applying programming fundamentals, graphical user interface development, event handling, and game logic.

2D Metroidvania Game | Godot Engine, GDScript

Worked on a 2D platformer project exploring game mechanics and interactive gameplay.

EDUCATION

Bachelor of Science in Information Technology | Centro Escolar University – Manila | Graduated 2026
